Trying to squeeze your training into one day is not only stressful but also means that often you don't make the most of the information you are gaining. You end up going back to your work routine, without being able to fully digest all the new information you have learnt.

Here's the solution....

RICTAT Educational Spa Break on the 11th & 12th November 2013

Spend a few nights at Champneys in Tring, have a restful learning experience spread over 2 days, take more time to discuss questions & opportunities with our exhibitors and at the same time, make the most of the wonderful spa facilities.

LEARN TO EARN

[See the full programme here](#)

This year we have designed an educational programme which will enable you to immediately increase your income as a colon hydrotherapist. Not only will you be pampered, rejuvenated and filled with amazing fresh food, but you will come back home with the knowledge of how to make money from your business without spending any extra time.

Rather than inviting speakers for short lectures, as we have done in previous years, we're focusing on just three things.

Create additional streams of income...

First, Galina Imrie, who as you know, is now focusing on education and marketing, will teach you how to create additional streams of income from physical and educational products. Galina is now starting to implement all the training that she has had with Digital Marketer in the last six months and is already seeing her own income increase. She is continuing to test the different things that she has learnt and will only talk about the ideas that work, that are easy to implement and that will make you more money. Galina's course will last six hours in total, which will be split over two days.

Learn a new skill...

Lynne McDougall will teach you to use energy healing as part of colon hydrotherapy treatments. Lynne is passionate about energy healing and it is an essential part of her successful practice.

Lynne McDougall, will teach you to use energy healing as part of your colon hydrotherapy treatments, as well as implement energy enhancing practical techniques into your personal life style. With the aim of rejuvenating and activating the body's own innate healing mechanisms.

As you know, creating positive energy is an essential skill for a successful colon hydrotherapist and this is a great opportunity to learn from a true master of energy healing. The course will last for a total of six hours, split over two days.

Supplement your existing income...

And finally, our valuable exhibitors will teach you more about their products and explain to you how selling their products in different forms will help you supplement your income as a therapist. They will also be offering special retreat packages for those who want to start accounts with them. See who will be exhibiting!
